

Advanced CSV To PDF Table Converter

Product Information Page:

http://www.advancedreliablesoftware.com/advanced_csv_to_pdf_table_converter.html

Advanced CSV To PDF Table Converter is a utility that allows execution of SQL (Structured Query Language) queries on CSV (Comma Separated Values) files. Resultsets returned by select SQL queries are automatically persisted as PDF table files to a directory of your choice.

Step 1 – Input File

Click the "Select Input CSV or TXT File" button and browse to an input CSV or TXT file.

Step 2 – SQL Select Query

The first row of your CSV or TXT file must contain column headers. (If your file does not contain column headers, add relevant column headers and repeat Step 1.) Column headers will enable you to identify specific columns in your SQL query. Enter your SQL select query. Enclose any column headers that contain space character in "[", "]" brackets.

Examples:

Select all columns from file named "sample.csv".

select * from [sample.csv]

Select columns with column headers "LastName", "FirstName", "Title" from file named "sample.csv".

select LastName, FirstName, Title from [sample.csv]

Step 2 - SQL Select Query

```
select LastName, FirstName, Title from [sample.csv]
```

Note: First row in your CSV or TXT file must contain column headers.

Select columns with column headers "Last Name", "First Name", "Title" from file named "sample.csv".

select [Last Name], [First Name], Title from [sample.csv]

Step 2 - SQL Select Query

```
select [Last Name], [First Name], Title from [sample.csv]
```

Note: First row in your CSV or TXT file must contain column headers.

Step 3 (Optional) – Column Headers

Check the "Insert Column Headers" check box to include table column headers in your output PDF document. Define one header for each column in your SQL query. To add new column header enter desired information in the input field and click the "Add Column Header" button. To remove specific column header select it in the grid and click the "Remove Column Header" button.

Step 3 (Optional) - Column Headers

Insert Column Headers

Column Headers
Last Name
First Name
Title

Add Column Header

Remove Column Header

Sample PDF output file table column headers:

Last Name	First Name	Title
Davolio	Nancy	Sales Representative
Fuller	Andrew	Vice President, Sales
Leverling	Janet	Sales Representative

Step 4 – Output PDF File Properties

Define properties of the output PDF document: page size, page orientation, font, font size.

Step 4 - Output PDF File Properties

PDF Page Size: Letter

PDF Page Orientation: Portrait Landscape

PDF Font: Arial PDF Font Size: 12

Step 5 – Output Directory

Click the “...” button to assign output directory path. The application will automatically persist your most recently used output directory path for future reference.

Step 5 - Output Directory

C:\Documents and Settings\Administrator\My Documents

Step 6 (Optional) – Output PDF File Name

Assign custom name for your PDF output file.

Step 6 (Optional) - Output PDF File Name

Output PDF File Name:

Step 7 – Execute SQL Query / Generate PDF Output

Click the “Execute SQL Query / Generate PDF Output” button to execute SQL query on your input file and generate an output PDF document. Your PDF output document will be created in the directory defined in Step 5.

Step 7 - Execute SQL Query / Generate PDF Output

Sample PDF output:

Last Name	First Name	Title
Davolio	Nancy	Sales Representative
Fuller	Andrew	Vice President, Sales
Leverling	Janet	Sales Representative
