

Advanced Excel To RTF Table Converter

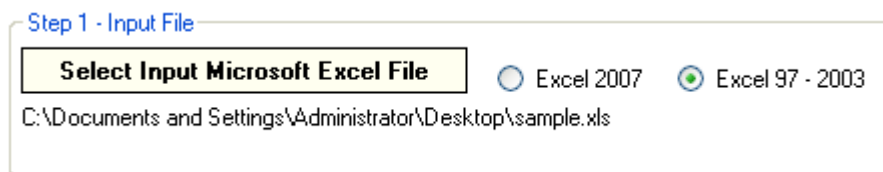

Product Information Page:

http://www.advancedreliablesoftware.com/advanced_excel_to_rtf_table_converter.html

Advanced Excel To RTF Table Converter is a utility that allows execution of SQL (Structured Query Language) queries on Microsoft Excel files. Resultsets returned by select SQL queries are automatically persisted as RTF table files to a directory of your choice.

Step 1 – Input File

Select Microsoft Excel version of your input file. Click the "Select Input Microsoft Excel File" button and browse to an input Microsoft Excel file.

The screenshot shows the 'Step 1 - Input File' window. It features a button labeled 'Select Input Microsoft Excel File'. To the right of the button are two radio buttons: 'Excel 2007' (unselected) and 'Excel 97 - 2003' (selected). Below these options, the file path 'C:\Documents and Settings\Administrator\Desktop\sample.xls' is displayed.

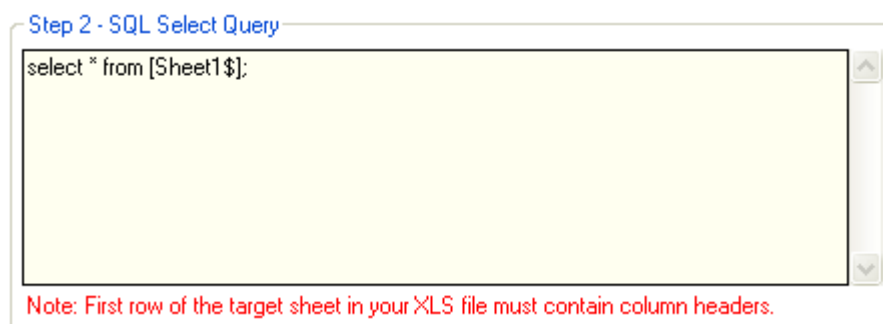

Step 2 – SQL Select Query

The first row of your Microsoft Excel file must contain column headers. (If your file does not contain column headers, add relevant column headers and repeat Step 1.) Column headers will enable you to identify specific columns in your SQL query. Enter your SQL select query. Enclose any column headers that contain space character in "[", "]" brackets.

Examples:

Select all columns from sheet named "Sheet1".

select * from [Sheet1\$];

The screenshot shows the 'Step 2 - SQL Select Query' window. It contains a text area with the SQL query 'select * from [Sheet1\$];'. Below the text area, there is a red note: 'Note: First row of the target sheet in your XLS file must contain column headers.'

Select columns with column headers "LastName", "FirstName", "Title" from sheet named "Sheet1".

select LastName, FirstName, Title from [Sheet1\$];

Step 2 - SQL Select Query

```
select LastName, FirstName, Title from [Sheet1$];
```

Note: First row of the target sheet in your XLS file must contain column headers.

Select columns with column headers "Last Name", "First Name", "Title" from sheet named "Sheet1".

select [Last Name], [First Name], Title from [Sheet1\$];

Step 2 - SQL Select Query

```
select [Last Name], [First Name], Title from [Sheet1$];
```

Note: First row of the target sheet in your XLS file must contain column headers.

Step 3 (Optional) – Column Headers

Check the "Insert Column Headers" check box to include table column headers in your output RTF document. Define one header for each column in your SQL query. To add new column header enter desired information in the input field and click the "Add Column Header" button. To remove specific column header select it in the grid and click the "Remove Column Header" button.

Step 3 (Optional) - Column Headers

Insert Column Headers

Column Headers	
Last Name	
First Name	
Title	

Input field:

Add Column Header

Remove Column Header

Sample RTF output file table column headers:

Last Name	First Name	Title
Davolio	Nancy	Sales Representative
Fuller	Andrew	Vice President, Sales
Leverling	Janet	Sales Representative

Step 4 – Output RTF File Properties

Define properties of the output RTF document: page size, page orientation, font, font size.

Step 4 - Output RTF File Properties

RTF Page Size: Letter

RTF Page Orientation: Portrait Landscape

RTF Font: Arial RTF Font Size: 12

Step 5 – Output Directory

Click the “...” button to assign output directory path. The application will automatically persist your most recently used output directory path for future reference.

Step 5 - Output Directory

C:\Documents and Settings\Administrator\My Documents

Step 6 (Optional) – Output RTF File Name

Assign custom name for your RTF output file.

Step 6 (Optional) - Output RTF File Name

Output RTF File Name:

Step 7 – Execute SQL Query / Generate RTF Output

Click the “Execute SQL Query / Generate RTF Output” button to execute SQL query on your input file and generate an output RTF document. Your RTF output document will be created in the directory defined in Step 5.

Step 7 - Execute SQL Query / Generate RTF Output

Sample RTF output:

Last Name	First Name	Title
Davolio	Nancy	Sales Representative
Fuller	Andrew	Vice President, Sales
Leverling	Janet	Sales Representative
